TuringDP Studio

Canada, Toronto

Developing video games & applications for all platforms.

A summary of TuringDP Studio

🏢TuringDP Studio is an international team specializing in developing applications and video games for all platforms, including Android, iOS, Windows, Mac, consoles, and more. Our goal at TuringDP is to develop the best, highest quality, and most unique video games and software possible, both artistically and technically, and make them available to the clients.

After five years of activity in the domestic market and countless projects, we have now entered the international market and aim to repeat our past success on a global scale. You can see some of the best projects we have been worked on below.

⚠️It should be noted that in all of the mentioned projects, the project contract was "FREELANCE" and mentioning TuringDP as the executing team was entirely at the discretion of the client.

Some of the mentioned projects (This file contains 3 pages)
